Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the closest prior art of record is Ishikawa et al '343' disclosed by applicant as part of the IDS filed on 7-19-2005. Ishikawa discloses a grooved glass substrate (11) (column 17 – lines 49 to 51), non-magnetic undercoat layer (12), orientation determining layer (13) which may be formed with Mo or W as a main component and Fe as a secondary component (column 16 – lines 18 to 20 and column 17 – lines 8 to 10), magnetic layer (14) and protective layer (15) formed in this order. The two differences between Ishikawa and claim 1 are: 1...the non-magnetic undercoat layer and orientation determining layer are in reverse order from that set forth in the claim and 2...the claim sets forth that the orientation determining layer is one of a CoW, CoMo, FeW or FeMo base alloy, i.e., Co or Fe must represent 50% or more of the respective material since Co and Fe are listed first, while Ishikawa discloses that the orientation determining layer may be formed mainly from Mo or W to which Fe may be added, i.e. Fe is a secondary component. The prior art of record does not provide a good motivation to change Ishikawa to address one of these differences, much less both.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
